Chennai, India

Professional Summary

Software Developer with 2 years of experience building production-grade web applications and RESTful APIs. Strong expertise in React and modern JavaScript ecosystems, implementing responsive and maintainable user interfaces based on defined requirements. Hands-on experience developing and integrating REST APIs, including third-party service integrations within enterprise platforms. Currently expanding backend capabilities with FastAPI while actively pursuing backend and full-stack engineering roles focused on scalable, API-driven systems.

Technical Skills

Languages: C++, C, Python, TypeScript, HTML, CSS, SQL

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Express, FastAPI

Database: PostgreSQL

Dev Tools: Git, GitHub, Linux, Vercel, Prisma ORM

Other: REST API development, Email Integration

Professional Experience

Software Developer – *Prodapt*

Jul 2024 – Present

- Develop and maintain production-grade React applications, implementing responsive UI components based on business requirements and API contracts.
- Contribute to backend API enhancements and bug fixes, supporting service reliability and performance.
- Previously developed inbound REST APIs and outbound integrations within enterprise platforms, enabling real-time data exchange with third-party systems.
- Integrated social media platforms (Facebook, Instagram, and Trustpilot) with ServiceNow modules for automated updates.
- Collaborated across teams to troubleshoot critical issues, contributing to overall delivery

Trainee – Software Development – *Prodapt*

Jan 2024 – Jun 2024

- Trained in foundational web technologies: HTML, CSS, JavaScript, SQL, Linux, shell scripting, and basic AWS.
- Completed practice projects and scripting exercises as part of internal training.

Projects

Personal Portfolio Website — www.kamaleshpathy.com

Next.js, Tailwind CSS, Typescript, GitHub API, Vercel, RPC

- Fully responsive portfolio hosted on Vercel showcasing projects and coding profile.

- Integrated GitHub API to dynamically display selected files from a code repository.
- Utilized a custom database to manage file metadata.
- Includes working contact form that sends emails to personal inbox using backend integration.
- Followed proper Git branching, PRs, and commits — mimicking a real dev workflow.

Spotify UI Clone

React.js, Tailwind CSS, JavaScript

- Built a UI clone to practice layout structuring, component design, and page routing.

Watch Shop Landing Page

HTML, CSS, JavaScript

- Designed a branded single-page site with animations and clean layout.

Education

B.E. Electronics and Communication Engineering

Rajalakshmi Institute of Technology, Chennai, 2023

Recognition

- Received Award at Prodapt for demonstrating consistency, learning agility, and dependable delivery on API development tasks.
